##

###

4 , 5 DOM(Document Object Model) . HTML , , . DOM → → → → .

1~6 6

1. **DOM (Document Object Model)**

- ****: (HTML) .
- ****: HTML (Tree) .
- ****: document.querySelector('h1') HTML .
- ****: DOM HTML , .
- ** **: DOM document .

2. ** (Element Selection)**

- ****: querySelector , getElementById HTML .
- ****: (Selector) DOM .
- ****: document.getElementById('main') document.querySelectorAll('.item')
- ****: querySelectorAll NodeList() .
- ** **: querySelector , querySelectorAll .

3. ** (Content & Style Manipulation)**

- ****: , , .
- ****: textContent style , classList DOM .
- ****: el.style.color = 'red' , el.textContent = ''
- ****: CSS (: background-color -> backgroundColor) .
- ** **: , HTML (innerHTML) .

4. ** (Event Listener)**

- ****: , .
- ****: (Callback) .
- ****: btn.addEventListener('click', () => { alert('!'); })
- ****: .
- ** **: .

5. ** (Node Creation)**

- ****: .
- ****: document.createElement() , appendChild() prepend() .
- ****: const li = document.createElement('li'); parent.appendChild(li);
- ****: .
- ** **: createElement appendChild .

```

6. ** (classList API)**
- ****: classList , , .
- ****: CSS , .
- ****: element.classList.add('active') , element.classList.toggle('hidden')
- ****: className classList API .
- ** **: classList.toggle , .

```

2

```

| | | |
| :--- | :--- | :--- |
| getElementById | (Element) | id |
| querySelector | (Element) | CSS |
| querySelectorAll | (NodeList) | CSS |

```

```

| | | |
| :--- | :--- | :--- |
| textContent | | |
| innerHTML | HTML | XSS |

```

3

```

1. ** **: body .dark-mode classList.toggle .
2. ** **: , <li> .
3. ** **: '' hidden , .

```

TOP 6

```

1. HTML : <script> <head> DOM .
2. : CSS ( element.style.background-color ).
3. querySelectorAll : NodeList (map) .
4. : .
5. innerHTML : .
6. : createElement .

```

&

```

- ****: "(Select) -> (Modify) -> (Event)" 3 !
- ****: document , getElementById .

```

6

```

- [] querySelector ?
- [] addEventListener ?
- [] style ?
- [] classList.add/remove ?
- [] createElement ?
- [] appendChild ?

```

1. DOM NodeList ?

A. getElementById

B. querySelector

C. querySelectorAll

D. getElementsByTagName()

: C

:

: querySelectorAll NodeList . getElementById querySelector .

2. ?

A. el.style.fontSize = '20px'

B. el.style.fontSize = '20px'

C. el.style['font size'] = '20px'

D. el.css('fontSize', '20px')

: B

: CSS

: CSS (camelCase) .

3. ?

A. btn.addEventListener('click', alert('Hello'))

B. btn.addEventListener('click', () => alert('Hello'))

C. btn.onEvent('click', alert)

D. btn.listen('click', function)

: B

:

: addEventListener () . A .

4. DOM ?

A. appendChild -> createElement

B. createElement -> appendChild

C. createNode -> insert

D. append -> create

: B

:

: createElement , appendChild DOM .

5. classList.toggle('active') ?

A. active .

B. active .

C. active , .

D. active .

: C

:

: toggle .

: (To-Do List)

, (CSS text-decoration: line-through) .

```
[ ]  
- (input)  
- createElement li  
-  
- li ()
```

[] querySelector, addEventListener, createElement, appendChild

```
[ ]  
1. 1. HTML input, button, ul  
2. 2. input li  
3. 3. li click
```
